BloodCenter of Wisconsin is a nonprofit, community-
based organization that has been partnering with 
donors to save lives since 1947. BloodCenter of 
Wisconsin advances patient care by providing life-
saving solutions grounded in unparalleled medical 
and scientific expertise. More information is available 
at www.bcw.edu.

Parking is available in BloodCenter of Wisconsin’s 
surface lot or Marquette University Public Parking ($5), 
16th Street lot. BloodCenter facilities are disability 
accessible and smoke free.

For more information or to make an appointment, please 
call 1-877-BE-A-HERO (232-4376) or visit www.bcw.edu.
Appointments are encouraged but walk-ins are welcome.
Program

Nurses play a key role throughout the blood transfusion process, including verifying physician orders, blood administration and recognition of transfusion reactions. This seminar will present information related to these and other relevant topics with the goal of increasing each nurse's knowledge about the blood transfusion process and ultimately improving patient safety.

Speakers

Susan T. Johnson, MSTM, MT(ASCP) SBB
Director-Clinical Education, BloodCenter of Wisconsin

Kathleen Puca, MD MT(ASCP) SBB
Medical Director, BloodCenter of Wisconsin
Medical Director, ACL Transfusion Services, Aurora Healthcare

Nanci Fredrich RN, BSN, MM
Transfusion Safety and Blood Management Officer, BloodCenter of Wisconsin

Julie DeLisle RN, MSN
Transfusion Safety and Blood Management Officer, BloodCenter of Wisconsin

Location: BloodCenter of Wisconsin
638 N 18th St.
Milwaukee, WI

Objectives

At the conclusion of this program the participant will be able to:

1. Describe the process for blood collection, preparation and testing.
2. Review indications for the use of blood and blood components (whole blood, red blood cells, plasma, platelets and cryoprecipitate).
3. List the types of transfusion reactions, methods to recognize a reaction and the care of such patients.
4. Discuss patient safety issues from blood sample collection, patient identification, patient care during transfusion and special administration requirements.

Upon completion of the program, 4.8 Contact Hours will be provided.

This continuing nursing education activity was approved by the Wisconsin Nurses Association, an accredited approver by the American Nurses Credentialing Center’s Commission on Accreditation.

Sophie was born with a rare genetic disorder that causes her body to produce an above normal amount of insulin. The diagnosis lead to several surgeries in which she received more than 10 units of blood, as well as a complete transfusion. Because of generous blood donors, she is now a vibrant young girl eager to fulfill her dream of helping children when she grows up.

Sickle cell patients like Lakiesha are not defined by their disease. Thanks to ongoing blood transfusions, Lakiesha has been able to travel the world through her college's study abroad programs.
